
You can make any article Open Access by archiving the post-print (the final accepted manuscript, after peer review). This is called Green Open Access.

63% of all journals automatically allow for post-print archiving. For most individual CVs, that number approaches 95%. [http://openaccess.eprints.org/index.php?/archives/833-The-Green-Open-Access-Blues-Fervent-Plea-to-SHERPA-Romeo-for-Colour-Reform.html, August 2011](http://openaccess.eprints.org/index.php?/archives/833-The-Green-Open-Access-Blues-Fervent-Plea-to-SHERPA-Romeo-for-Colour-Reform.html)

WSU Libraries offer a solution for archiving post-prints (and more), [http://digitalcommons.wayne.edu](http://digitalcommons.wayne.edu)
BECOMING OPEN ACCESS
WHAT YOU CAN DO

1. When you publish, send a copy of your post-print to the library. We’ll take care of the rest. Do this every time you publish.

Send us your CV. We’ll determine if any of your existing publications can be archived, and we’ll do it for you or help you do it yourself.
