This Annual Report is brought to you for free and open access by the Wayne State University Libraries at DigitalCommons@WayneState. It has been accepted for inclusion in Library Publications by an authorized administrator of DigitalCommons@WayneState.
Wayne State Brings Library Instruction to Cass Tech Students

Wayne State University launched a campaign to raise $200,000 for the Wayne State University Library System. The campaign focuses on several areas of the Library System. The special collections room will have regular hours of operation and will be attended by a staff librarian to assist scholars with accessing and using the materials available to current researchers, but also to preserving them for the historical record and for the use of future researchers. The special collections room now has regular hours of operation and will be attended by a staff librarian to assist scholars with accessing and using the materials available to current researchers, but also to preserving them for the historical record and for the use of future researchers.

Every year, we strive to make the Library System an even better place to work and learn. We focus on our values: client service excellence, enhanced facilities, improved accessibility to resources and knowledgeable and friendly staff. In addition, we continue to strive to provide access to electronic information wherever and whenever it is needed to use technology effectively in gathering, organizing, and evaluating information and in making decisions.

In 2007, the Library System implemented ArticleReach, a service that allows users to search journals electronically by accessing the collections of seven different research libraries participating in the service. The users can search the Library System’s Articles and Databases or Google Scholar, which will be designed as searchable through ArticleReach and will contain a search to locate the cited article online through Wayne State databases. If available, a link will appear for the full-text access. If there is no electronic access, the request will be scanned and delivered to patrons. If the request cannot be fulfilled electronically, it will automatically get transferred to the Interlibrary Loan Department.

Wayne State University Library Instruction in Cass Tech Students

In partnership with Beaumont Hospital and Wayne State University, the Royal Oak Public Library launched the Health Information Portal at the Royal Oak Public Library. Wayne State University Library presented a program designed to provide direct access to high quality health information resources at no charge to the general public. The Wayne State Library and Information Science Program assisted with the quality evaluation component of the project and the Royal Oak Public Library presented a program designed to provide direct access to high quality health information resources at no charge to the general public. Wayne State University Library presented a program designed to provide direct access to high quality health information resources at no charge to the general public.

The LIS Program launched two new paths for students to take in their career endeavors beginning in the Spring of 2008. The Information Management for Librarians certificate program provides students with the tools needed to use technology effectively in gathering, organizing, and evaluating information.
This page contains various topics and articles, including:

- An article about the Wayne State University Library System and its various services and improvements.
- Information about the Library and Information Science Program at Wayne State University, including the appointment of Joseph J. Mika as the new director.
- A New York Times article discussing the latest advancements in virtual citizenship and the role of libraries in that context.
- A Detroit Big Read program announcement featuring the selection of a novel for the community-wide reading program.
- A report on the Library System's annual budget and statistics, including the number of e-books, full-text articles downloaded, and gate count for all libraries.

These topics are presented in a natural text format, with relevant details and statistics included. The content is sourced from various newspapers and libraries, providing a comprehensive overview of the topics discussed.
