## Recommended Citation

Shoshani J (Ed.). 1979. Bibliography. *Elephant*. 1(3):69-90.

This Elephant Bibliography is brought to you for free and open access by the Open Access Journals at DigitalCommons@WayneState. It has been accepted for inclusion in Elephant by an authorized editor of DigitalCommons@WayneState.

## BIBLIOGRAPHY

We are continuing to group the references in blocks of five years for quick and handy reference. The final objective of all this compiling is to have the most complete elephant bibliography. Starting at the present and going back, we will devote each successive issue to another five year period. The references listed below were retrieved from different sources: Computer Bibliographic Search Services (CBSS, the same used in previous newsletters -- the latest search update was done on March 20, 1979), books in the editor's office, EIG questionnaires, and other literature crossing the editor's desk. This bibliography does not include any references listed in the bibliographies of previous newsletters. As a rule, we list extant species of elephant, but occasionally a reference on fossil Elephantidae appears; it is designated by an asterisk (\*). In the references taken from the computer and books, the word "elephant" may or may not be a part of the title even though elephants are mentioned one way or another in the articles. We thought it would be better to leave these references in, as someone is bound to make use of them. We cannot honor requests for reprints of articles listed in the bibliographies. Readers are requested to send in any references (their own or others') of publications dealing with elephants. Please list them in the bibliographical form used below.

Prepared by the Bibliography Committee: Diane Boman, Sherri DeFauw, Stephen Devoe, Richard Lair, Yvonne Lange, John McKinney, Barbara Markell, Ray (Sabu) Moreau, William Prychodko, Jeheskel (Hezy) Shoshani, and Mary Jo Szuba.
