JMASM (ISSN 1538–9472, <http://digitalcommons.wayne.edu/jmasm>) is an independent, open access electronic journal, published biannually in May and November by JMASM Inc. (PO Box 48023, Oak Park, MI, 48237) in collaboration with the Wayne State University Library System. *JMASM* seeks to publish (1) new statistical tests or procedures, or the comparison of existing statistical tests or procedures, using computer-intensive Monte Carlo, bootstrap, jackknife, or resampling methods, (2) the study of nonparametric, robust, permutation, exact, and approximate randomization methods, and (3) applications of computer programming, preferably in Fortran (all other programming environments are welcome), related to statistical algorithms, pseudo-random number generators, simulation techniques, and self-contained executable code to carry out new or interesting statistical methods.

Journal correspondence (other than manuscript submissions) and requests for advertising may be forwarded to ea@jmasm.com. See back matter for instructions for authors.

Journal of Modern Applied Statistical Methods

Vol. 16, No. 2

❧ November 2017 ❧

Table of Contents

Invited Articles

3 – 28	M. HARWELL N. KOHLI Y. PERALTA	Experimental Design and Data Analysis in Computer Simulation Studies in the Behavioral Sciences
29 – 38	R. WILCOX	The Regression Smoother LOWESS: A Confidence Band That Allows Heteroscedasticity And Has Some Specified Simultaneous Probability Coverage

Regular Articles

40 – 80	A. ALKHALAF B. D. ZUMBO	The Impact of Predictor Variable(s) with Skewed Cell Probabilities on Wald Tests in Binary Logistic Regression
81 – 98	A. D. WU B. D. ZUMBO	Using Pratt's Importance Measures in Confirmatory Factor Analyses
99 – 123	T. T. SAJOBI L. M. LIX	Robust Measures of Variable Importance for Multivariate Group Designs
124 – 137	D. K. GHOSH S. AHUJA	On Variance Balanced Designs
138 – 156	J. KUMAR A. CHATURVEDI U. AFIFA S. YOUSUF S. KUMAR	Unit Root Test for Panel Data AR(1) Time Series Model With Linear Time Trend and Augmentation Term: A Bayesian Approach

157 – 185	H. J. TURNER P. NATESAN R. K. HENSON	Performance Evaluation of Confidence Intervals for Ordinal Coefficient Alpha
186 – 199	L. TURPIN	Effectively Comparing Differences in Proportions
200 – 214	A. M. GOULD J. E. JOULLIÉ	'Parallel Universe' or 'Proven Future'? The Language of Dependent Means <i>t</i> -Test Interpretations
215 – 230	P. M. BROWN J. A. EZEKOWITZ	Power and Sample Size Estimation for Nonparametric Composite Endpoints: Practical Implementation using Data Simulations
231 – 255	H. Y. ELEDUM	A Monte Carlo Study of the Effects of Variability and Outliers on the Linear Correlation Coefficient
256 – 276	M. AJAMI S. M. A. JAHANSHAHI	Parameter Estimation In Weighted Rayleigh Distribution
277 – 309	A. A. MITANI K. P. NELSON	Modeling Agreement between Binary Classifications of Multiple Raters in R and SAS
310 – 321	M. FAIZAN Z. HAQUE M. A. ANSARI	Characterizations of Distributions by Expected Values of Lower Record Statistics with Spacing
322 – 346	L. N. B. DAKHN M. A. H. EBRAHEM O. EIDOUS	Semi-Parametric Method to Estimate the Time-to-Failure Distribution and its Percentiles for Simple Linear Degradation Model
347 – 358	S. LIPOVETSKY	Prediction of Percent Change in Linear Regression by Correlated Variables <i>s</i>
359 – 377	G. REKABDAR R. CHINIPARDAZ	Approximating the Distribution of Indefinite Quadratic Forms in Normal Variables by Maximum Entropy Density Estimation
378 – 402	P. ZANINOTTO A. SACKER	Missing Data in Longitudinal Surveys: A Comparison of Performance of Modern Techniques
