**Kids CAN Get Covid-19**
One study suggests kids might even carry more virus than adults!

**Infants get Covid-19 too**
A review found children ages 0-18 months can get Covid-19 and show symptoms.

**Kids CAN Get Very Sick**
One study found 2% of kids with Covid-19 were admitted to the ICU.

**Kids HAVE symptoms**
Kids can develop fever or cough. Severe cases even show respiratory/kidney failure.

**Kids SPREAD Covid-19**
One study identified family clusters as a major source of transmission.

**Wear a mask!**
You protect your family and others from Covid-19 when you and your child wear a mask.
