COVID-19 + BCG

Does the Bacillus Calmette-Guérin (BCG) vaccine provide immunity against COVID-19?

50M

Since December 2019, over 50 million people worldwide have been diagnosed with COVID-19, with new cases each day.

COVID-19

BCG VACCINE

BCG vaccine protects patients from tuberculosis, and other viral infections. Since COVID-19 has similar symptoms, people believe the BCG vaccine may provide immunity against COVID-19.

6,000

Multiple studies, totaling 6,000 patients, have **FAILED** to show evidence that the BCG vaccine provides immunity against COVID-19.

RESEARCH

WORLD HEALTH ORGANIZATION

World Health Organization has **cautioned against** using the BCG vaccine as prevention or treatment for COVID-19 due to lack of clinical evidence.

PREVENTION

- If you feel sick, stay home
- Wash hands frequently
- Wear a mask
- Practice social distancing
