Do **HOT WEATHER** and **SUNSHINE** Stop the Spread of **COVID-19**?

Alessio-Bilowus D, Bahzad A, Desai S, Peppers I, Qureshi Z, Shah S. Wayne State University School of Medicine, Detroit, MI. November 2020

**Bright sunshine does
NOT lower virus
transmission rates**

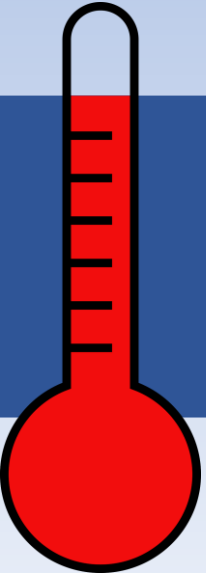

— studies across hundreds of cities show no decrease of infection with increased UV exposure

did you know?

it takes sustained temperatures of up to **160° F** to inactivate the COVID-19 coronavirus

**Hot summertime
temperatures do
NOT kill the virus**

**COVID-19 still spreads
especially through
large crowds & parties
EVEN OUTDOORS!**

SO WEAR A **MASK**
AVOID large groups,
and stay **6 FEET** apart
