Children are not at risk for getting COVID-19

Children don't develop serious problems from COVID-19

Children don't need to take the same precautions as everyone else

While fewer children have been infected than adults, over one million children tested positive for COVID-19

Children can sometimes have very serious problems with COVID including damage to the heart and brain in a condition called MIS-C

Children over 2 years should wear masks. Tips to encourage this:
- Decorate the mask together
- Practice wearing masks at home
- Draw a picture of your child's favorite character wearing a mask
