This Conference Proceeding is brought to you for free and open access by the Wayne State University Libraries at DigitalCommons@WayneState. It has been accepted for inclusion in Library Scholarly Publications by an authorized administrator of DigitalCommons@WayneState.

Design Rubric for Course Guide

Process	Minimal	Adequate	Exemplary	Pedagogical or Design Principle
Topic selection	Left to student	Link to encyclopedia	Provide instruction about topic selection and link to subject-based background sources	Metacognition Chunking
Library resources	Link to database list	Link to selected databases with a brief text description	Link to a few selected databases in order of preference with instructional materials on how to search	Reduce cognitive load Scaffolding Chunking
Internet resources	Left to student	Link to Google Scholar search	Provide instruction on web evaluation; link to selected resources	Reduce cognitive load Scaffolding Chunking
Help	Link to library contact page	Link to contact page and embed online services	Direct link to liaison librarian contact info with image	Metacognition Confidence & Reassurance
Writing assistance	Left to student	Link to the OWL guide	Link to specific assistance for type of assignment, built in appropriate sequence, and link to university Writing Center	Metacognition Scaffolding Confidence & Reassurance

Some general design principles:

Use [CARP Design Principles](#): Contrast, Alignment, Proximity, Repetition

Online environment allows for text + sound + graphics + video + interactive components

Content should be sequenced to best reflect the process required to complete the assignment.

One chunk answers one question about one process for one purpose

Studies have shown reading online is slower. A general principal is that online conversion of a text-based document should have no more than 50% of the original text word count. In concise writing, every word contributes to the sentence and every sentence to the educational goal.

Use bullets, numbering and font attributes to carry meaning. These graphical and textual signals can help with scanning.

Text should mirror the language of the course text, syllabus, assignment and other relevant documentation.

It is OK to repeat contextual information each place it is needed, and provide links to related information.
