This Front Matter is brought to you for free and open access by the Open Access Journals at DigitalCommons@WayneState. It has been accepted for inclusion in Journal of Modern Applied Statistical Methods by an authorized editor of DigitalCommons@WayneState.

The easy way to find open access journals

DOAJ DIRECTORY OF
OPEN ACCESS
JOURNALS

www.doaj.org

The Directory of Open Access Journals covers free, full text, quality controlled scientific and scholarly journals. It aims to cover all subjects and languages.

Aims

- Increase visibility of open access journals
- Simplify use
- Promote increased usage leading to higher impact

Scope

The Directory aims to be comprehensive and cover all open access scientific and scholarly journals that use a quality control system to guarantee the content. All subject areas and languages will be covered.

In DOAJ browse by subject

Agriculture and Food Sciences
Biology and Life Sciences
Chemistry
General Works
History and Archaeology
Law and Political Science
Philosophy and Religion
Social Sciences

Arts and Architecture
Business and Economics
Earth and Environmental Sciences
Health Sciences
Languages and Literatures
Mathematics and statistics
Physics and Astronomy
Technology and Engineering

Journal Of Modern Applied Statistical Methods

Shlomo S. Sawilowsky

Editor

College of Education
Wayne State University

Bruno D. Zumbo

Associate Editor

Measurement, Evaluation, & Research Methodology
University of British Columbia

Vance W. Berger

Assistant Editor

Biometry Research Group
National Cancer Institute

Todd C. Headrick

Assistant Editor

Educational Psychology and Special Education
Southern Illinois University-Carbondale

Harvey Keselman

Assistant Editor

Department of Psychology
University of Manitoba

Alan Klockars

Assistant Editor

Educational Psychology
University of Washington

Patric R. Spence

Editorial Assistant

Department of Communication
Wayne State University

Editorial Board

Subhash Chandra Bagui
Department of Mathematics & Statistics
University of West Florida

J. Jackson Barnette
School of Public Health
University of Alabama at Birmingham

Vincent A. R. Camara
Department of Mathematics
University of South Florida

Ling Chen
Department of Statistics
Florida International University

Christopher W. Chiu
Test Development & Psychometric Rsch
Law School Admission Council, PA

Jai Won Choi
National Center for Health Statistics
Hyattsville, MD

Rahul Dhanda
Forest Pharmaceuticals
New York, NY

John N. Dyer
Dept. of Information System & Logistics
Georgia Southern University

Matthew E. Elam
Dept. of Industrial Engineering
University of Alabama

Mohammed A. El-Saidi
Accounting, Finance, Economics &
Statistics, Ferris State University

Felix Famoye
Department of Mathematics
Central Michigan University

Barbara Foster
Academic Computing Services, UT
Southwestern Medical Center, Dallas

Shiva Gautam
Department of Preventive Medicine
Vanderbilt University

Dominique Haughton
Mathematical Sciences Department
Bentley College

Scott L. Hershberger
Department of Psychology
California State University, Long Beach

Joseph Hilbe
Departments of Statistics/ Sociology
Arizona State University

Sin-Ho Jung
Dept. of Biostatistics & Bioinformatics
Duke University

Jong-Min Kim
Statistics, Division of Science & Math
University of Minnesota

Harry Khamis
Statistical Consulting Center
Wright State University

Kallappa M. Koti
Food and Drug Administration
Rockville, MD

Tomasz J. Kozubowski
Department of Mathematics
University of Nevada

Kwan R. Lee
GlaxoSmithKline Pharmaceuticals
Collegeville, PA

Hee-Jeong Lim
Dept. of Math & Computer Science
Northern Kentucky University

Balgobin Nandram
Department of Mathematical Sciences
Worcester Polytechnic Institute

J. Sunil Rao
Dept. of Epidemiology & Biostatistics
Case Western Reserve University

Karan P. Singh
University of North Texas Health
Science Center, Fort Worth

Jianguo (Tony) Sun
Department of Statistics
University of Missouri, Columbia

Joshua M. Tebbs
Department of Statistics
Kansas State University

Regular Articles

11 – 34 **Biao Zhang** Testing the Goodness of Fit of Multivariate Multiplicative-intercept Risk Models Based on Case-control Data

35 – 42 **Panagiotis Mantalos** Two Sides of the Same Coin: Bootstrapping the Restricted vs. Unrestricted Model

43 – 52 **John P. Wendell,
Sharon P. Cox** Coverage Properties of Optimized Confidence Intervals for Proportions

53 – 62 **Rand R. Wilcox,
Mitchell Earleywine** Inferences about Regression Interactions via a Robust Smoother with an Application to Cannabis Problems

63 – 74 **Stan Lipovetsky,
Michael Conklin** Regression by Data Segments via Discriminant Analysis

75 – 80 **W. A. Abu-Dayyeh,
Z. R. Al-Rawi,
M. MA. Al-Momani** Local Power for Combining Independent Tests in the Presence of Nuisance Parameters for the Logistic Distribution

81 – 89 **B. Sango Otieno,
C. Anderson-Cook** Effect of Position of an Outlier on the Influence Curve of the Measures of Preferred Direction for Circular Data

90 – 99 **Inger Persson,
Harry Khamis** Bias of the Cox Model Hazard Ratio

100 – 105 **David A. Walker** Bias Affiliated with Two Variants of Cohen's d When Determining U_1 as A Measure of the Percent of Non-Overlap

106 – 119 **C. Anderson-Cook,
Kathryn Prewitt** Some Guidelines for Using Nonparametric Methods for Modeling Data from Response Surface Designs

120 – 133 **Gibbs Y. Kanyongo** Determining the Correct Number of Components to Extract from a Principal Components Analysis: A Monte Carlo study of the Accuracy of the Scree Plot

134 – 139 **Abdullah Almasri,
Ghazi Shukur** Testing the Casual Relation Between Sunspots and Temperature Using Wavelets Analysis

140 – 154 **Leming Qu** Bayesian Wavelet Estimation of Long Memory Parameter

- 155 – 162 **Kosei Fukuda** Model-Selection-Based Monitoring of Structural Change
- 163 – 171 **Lyle Broemeling,
Dongfeng Wu** On the Power Function of Bayesian Tests with
Application to Design of Clinical Trials: The Fixed-
Sample Case
- 172 – 186 **Vincent Camara,
Chris P. Tsokos** Bayesian Reliability Modeling Using Monte Carlo
Integration
- 187 – 213 **Michael C. Long,
Ping Sa** Right-tailed Testing of Variance for Non-Normal
Distributions
- 214 – 226 **Hasan Hamdan,
John Nolan,
Melanie Wilson,
Kristen Dardia** Using Scale Mixtures of Normals to Model
Continuously Compounded Returns
- 227 – 239 **Michael B.C. Khoo,
T. F. Ng** Enhancing the Performance of a Short Run Multivariate
Control Chart for the Process Mean
- 240 – 250 **Paul A. Nakonezny,
Joseph Lee Rodgers** An Empirical Evaluation of the Retrospective Pretest:
Are There Advantages to Looking Back?
- 251 – 274 **Yonghong Jade Xu** An Exploration of Using Data Mining in Educational
Research
- 275 – 282 **Bruno D. Zumbo,
Kim H Koh** Manifestation of Differences in Item-Level
Characteristics in Scale-Level Measurement Invariance
Tests of Multi-Group Confirmatory Factor Analyses
- Brief Report*
- 283 – 287 **J. Thomas Kellow** Exploratory Factor Analysis in Two Measurement
Journals: Hegemony by Default
- Early Scholars*
- 288 – 299 **Ling Chen,
Mariana Drane,
Robert F. Valois,
J. Wanzer Drane** Multiple Imputation for Missing Ordinal Data
- JMASM Algorithms and Code*
- 300 – 311 **Hakan Demirtas** JMASM16: Pseudo-Random Number Generation in R
for Some Univariate Distributions (R)

312 – 318	Sikha Bagui, Subhash Bagui	JMASM17: An Algorithm and Code for Computing Exact Critical Values for Friedman's Nonparametric ANOVA (Visual Basic)
319 – 332	J. I. Odiase, S. M. Ogbonmwan	JMASM18: An Algorithm for Generating Unconditional Exact Permutation Distribution for a Two-Sample Experiment (Visual Fortran)
333 – 342	David A. Walker	JMASM19: A SPSS Matrix for Determining Effect Sizes From Three Categories: r and Functions of r , Differences Between Proportions, and Standardized Differences Between Means (SPSS)

Statistical Software Applications & Review

343 – 351	Paul Mondragon, Brian Borchers	A Comparison of Nonlinear Regression Codes
-----------	---	--

Letter To The Editor

352	Shlomo Sawilowsky	Abelson's Paradox And The Michelson-Morley Experiment
-----	--------------------------	---

JMASM is an independent print and electronic journal (<http://tbf.coe.wayne.edu/jmasm>) designed to provide an outlet for the scholarly works of applied nonparametric or parametric statisticians, data analysts, researchers, classical or modern psychometricians, quantitative or qualitative evaluators, and methodologists. Work appearing in *Regular Articles*, *Brief Reports*, and *Early Scholars* are externally peer reviewed, with input from the Editorial Board; in *Statistical Software Applications and Review* and *JMASM Algorithms and Code* are internally reviewed by the Editorial Board.

Three areas are appropriate for *JMASM*: (1) development or study of new statistical tests or procedures, or the comparison of existing statistical tests or procedures, using computer-intensive Monte Carlo, bootstrap, jackknife, or resampling methods, (2) development or study of nonparametric, robust, permutation, exact, and approximate randomization methods, and (3) applications of computer programming, preferably in Fortran (all other programming environments are welcome), related to statistical algorithms, pseudo-random number generators, simulation techniques, and self-contained executable code to carry out new or interesting statistical methods. Elegant derivations, as well as articles with no take-home message to practitioners, have low priority. Articles based on Monte Carlo (and other computer-intensive) methods designed to evaluate new or existing techniques or practices, particularly as they relate to novel applications of modern methods to everyday data analysis problems, have high priority.

Problems may arise from applied statistics and data analysis; experimental and nonexperimental research design; psychometry, testing, and measurement; and quantitative or qualitative evaluation. They should relate to the social and behavioral sciences, especially education and psychology. Applications from other traditions, such as actuarial statistics, biometrics or biostatistics, chemometrics, econometrics, environmetrics, jurimetrics, quality control, and sociometrics are welcome. Applied methods from other disciplines (e.g., astronomy, business, engineering, genetics, logic, nursing, marketing, medicine, oceanography, pharmacy, physics, political science) are acceptable if the demonstration holds promise for the social and behavioral sciences.
