Recommended Citation

Editors, JMASM (2010) "Front Matter," *Journal of Modern Applied Statistical Methods*: Vol. 9 : Iss. 1 , Article 1.

DOI: 10.22237/jmasm/1272686400

Available at: <http://digitalcommons.wayne.edu/jmasm/vol9/iss1/1>

This Front Matter is brought to you for free and open access by the Open Access Journals at DigitalCommons@WayneState. It has been accepted for inclusion in Journal of Modern Applied Statistical Methods by an authorized editor of DigitalCommons@WayneState.

Journal Of Modern Applied Statistical Methods

Shlomo S. Sawilowsky

Editor

College of Education
Wayne State University

Harvey Keselman

Associate Editor

Department of Psychology
University of Manitoba

Bruno D. Zumbo

Associate Editor

Measurement, Evaluation, & Research Methodology
University of British Columbia

Vance W. Berger

Assistant Editor

Biometry Research Group
National Cancer Institute

John L. Cuzzocrea

Assistant Editor

Educational Research
University of Akron

Todd C. Headrick

Assistant Editor

Educational Psychology and Special Education
Southern Illinois University-Carbondale

Alan Klockars

Assistant Editor

Educational Psychology
University of Washington

Journal Of Modern Applied Statistical Methods

Invited Articles

314 – 331	Dongquan Zhang, C. Mitchell Dayton	JMASM30 PI-LCA: A SAS Program Computing the Two-Point Mixture Index of Fit for Two-class LCA Models with Dichotomous Variables (SAS)

JMASM is an independent print and electronic journal (<http://www.jmasm.com/>), publishing (1) new statistical tests or procedures, or the comparison of existing statistical tests or procedures, using computer-intensive Monte Carlo, bootstrap, jackknife, or resampling methods, (2) the study of nonparametric, robust, permutation, exact, and approximate randomization methods, and (3) applications of computer programming, preferably in Fortran (all other programming environments are welcome), related to statistical algorithms, pseudo-random number generators, simulation techniques, and self-contained executable code to carry out new or interesting statistical methods.

Editorial Assistant: **Julie M. Smith**
