- Ask your group member to have a private, one-on-one conversation
- Voice your concerns about your group members' behaviour in a kind, non-judgemental way
- Ask your group member if there are barriers preventing them from completing their share of the assignment; reassure your peer that you are available to support them
- Work together to discuss ways to for your peer to complete their portion of the assignment

Wayne State University School of Medicine

Reflection: Peer Conflict

- Teamwork and communication are both vital skills that physicians must entail and practice while working with other healthcare professionals to treat patients. This is related to the third stage of professional identity formation that focuses on being team oriented.
- The white coat is a reminder to not only work together but also to not judge one another. This is important to create a welcoming environment since we are not always aware of the challenges that others face.
