Total	227	50

Many elephants in Jones' paper were designated as "died", "killed" or "destroyed" so that the figure of 227 includes only those Asian elephants (Elephas maximus) that were living or that their fate is/was unknown, and that were held in fifty various zoos and circuses around the world, excluding North America, as of June 26, 1974.

In order to keep the above survey up-to-date, readers are requested to send to the editor any information regarding the number of elephants held in captivity, either in zoos, circuses, private or any other collections in North America or in any part of the world.

MISCELLANEOUS

ELEPHANT LIBRARY

The idea of establishing an Elephant Library was brought up and discussed with several members on Wayne State University's campus. It is introduced here so that other members can suggest or express their ideas in writing.

The basic objective is to establish an Elephant Library which can serve Elephant Interest Group (EIG) members as well as non-members. For this purpose I am trying to acquire books that deal with any aspects of the natural history of elephants. A letter was dispatched to various publishers in the United States and abroad requesting a list of books and their prices. It was suggested that readers having in their possession any books that they wish to donate to the Elephant Library be encouraged to do so.

It is hoped that once the collection is organized and catalogued, EIG members and non-members (members have first priority) will borrow books. The main problem, of course, is finding a space to house the library and enlisting the aid of a person to care for the collection on a part-time basis.

ERRATUM

In Elephant Newsletter, no. 1, an error appeared on page 6. The Elephant Symposium is planned to take place during the 59th Annual Meeting of the ASM at Corvallis, Oregon and not at Portland, Oregon as was stated in the first printing of the previous issue. This error was corrected in subsequent printings.

POTPOURRI

Acknowledgements: In addition to the acknowledgements referred to in "A Note From the Editor", the editor wishes to thank all those members who sent information to the newsletter; especially, I would like to thank Richard J. Reynolds, Marvin L. Jones and Toby Styles. The editor also wishes to acknowledge the following persons: Paul Engstrom, Peggy Shine, Jackie Tien, and Karen Varty, all of whom are students at Grosse Pointe South High School (GPSHS), and who came to help the editor with various office work. The editor would also like to acknowledge GPSHS' Environmental Science teacher, Greg Heffner. Andy Prychodko also helped with office work and Heide Zaydel prepared the phylogenetic chart for the elephant display case on the Wayne State University campus. Sherwin S. Collins was most helpful in expediting the final typing.

Ahmed: The following is additional information about Ahmed the elephant (see also back front cover) as was sent to the editor on October 14, 1977, by Alison K. K. Hillman. She writes: "Ahmed preservation at the National Museum of Nairobi, Kenya, is in the form of:

- 1) a life-size (and very life-like) epoxy version cast, since the skin was not preserved in time to be stuffed, and
- 2) the complete real skeleton (erected by my husband Chris, with help from me) which will shortly bear the real tusks."

Back Issues: Back issues of Elephant Newsletter no. 1 can be obtained for one dollar per copy. Please send a check or money order payable to Wayne State University, Department of Biology, and indicate on the back or below under memo, "Elephant Interest Group" or just "Elephant". Please do not send cash. After the regular mailing list is completed, copies of Elephant Newsletter no. 2 will be available for two dollars per copy.
